IEEE Members	\$60	\$100
All IEEE Student Members	\$25	\$40

Register online: <http://london.ieee.ca/>

Lunch & refreshments provided

IEEE Workshop Getting More from your Smart Grid Investment

Abstract

This discussion will cover the following topics:

- Benefits of smart grids to the three customer segments (residential, commercial and industrial)
- Measuring the costs and benefits of smart grid
- Applications of smart grid technology
- The need for analytics and the foundation knowledge required for analytics

Bio

Doug Houseman is the lead architect for the Smart Grid Interoperability Panel's Conceptual Architecture Project, the coordinator for Smart Grid Tutorials for IEEE, Secretary of the IEEE Smart Grid Coordinating Committee and the lead author of the CEATI Distribution Utility Technology Roadmap. He has done work on all 7 continents and worked with more than 200 utilities around the world during his career. Doug is a member of IEEE PES, PELS, VSS, CSS, Computer Society, Communications Society and SA.
